## DETAILED ACTION

1. Applicant's amendment filed on 4/22/03, has been received and entered.
2. Claims 1-4 are presented for examination.

### *Claim Rejections - 35 U.S.C. § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kase et al, US patent (4,949,328).

Regarding claim 1, Kase et al teach a disk player [fig 4] for holding a plurality of disks [22] at disk standby positions in a casing [1], so that a disk [22] selected from said plurality of disks [one of the disks 22] is transferred to a disk playing area [fig 6] in said casing and is reproduced, comprising: a plurality of disk trays [13, fig 6] which are stacked in a predetermined direction [y direction] for receiving said plurality of disks [22] thereon (see fig 8); disk playing assembly [37 and 43, fig 7] for clamping and playing one of said plurality of disks [22] have been moved to said disk playing area to reproduce information recorded on said disk [CD]; and a supporting mechanism [4a] for supporting said disk playing assembly [37 and 43] thereon, wherein during a movement in which one of disk trays [13] is being moved from said disk standby area [bottom position, fig 6] to

said disk playing position [ top position at 37, fig 6], said one of disk trays [13] comes into engagement with said disk supporting mechanism [4a] so that said disk playing assembly [37 and 43] is caused to move in said predetermined direction thereto (see figs 17-19), and clamp and play said one of plurality of disks [22] (see figs 6-7 and 17-19).

*Allowable Subject Matter*

5. Claim 2-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Regarding claim 2, none of the prior art of record taken alone or in combination teaches or suggests that the support mechanism is rotatably support about a rocking fulcrum, said disk playing assembly is supported a part from said rocking fulcrum on said supporting mechanism, and said disk playing assembly is moved in said predetermined direction by rotating said supporting mechanism about said rocking fulcrum.

6. Applicant's arguments with respect to claims 1 have been considered but are moot in view of the new ground(s) of rejection.

*The prior art made of record and not relied upon*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Yamamura, US. Patent (4,410,921).
- b. Hayashi et al, US patent (6,519,222).

- c. Nakanishi et al, US patent (6,359,854).
  - d. Johnson et al, US patent (4,453,188).
